

B & D Monthly

Memorial Day weekend traditionally marks the unofficial beginning of Summer. It is a time for cookouts, family get-togethers, graduation parties, and hopefully a few months of rest and relaxation from the usual commitments that fill our schedules.

We, at B & D Construction, ask that you also take this time to remember all of our service men and women who have voluntarily answered the call to serve our country.

On Saturday, May 28th, we will be participating in the Fourth Annual Raynham Memorial Day Parade, to “Celebrate Our Fallen Heroes”.

The parade begins at 10:00 AM at the Merrill School parking lot at 687 Pleasant Street. The three-mile route will continue along Pleasant Street through the four-corner intersection by the Stone Church, where American flags will line the streets, and proceed onto South Main Street and over to King Philip Street.

There, at the Gazebo Park, a memorial service will be held, including a traditional flag-folding ceremony to honor our fallen heroes. Veterans of all ages and current members of the military are cordially invited to participate as guests of honor, and everyone is invited to line the parade route and attend the memorial service. For more information, contact RAVE at ravevolunteercoordinator@gmail.com or Sandy at 508-272-7245.

Home Exterior Care and Landscaping

Now is the time to take advantage of the warm weather and spruce up the exterior of your home, and tackle some landscaping projects. Below are some suggestions to improve the curb appeal of your home:

Windows/Siding: Wash the outside of your windows and clean the siding. While it might be tempting to use a pressure washer, a garden hose is best to avoid potentially damaging the exterior of your home. Apply a coat of fresh paint if needed, and have any damaged vinyl or aluminum siding repaired.

Termites/Carpenter Ants: Be aware of termites and carpenter ants while you're outside inspecting your home. Look for telltale signs like flaking wood, mud buildup and tunneling systems in the exterior wood of your home. Termites and carpenter ants can easily go undetected until significant damage has been done. The main targets are the studs in the walls and roof rafters, which would need to be repaired properly to ensure that the structure is safe and the value of the property does not decline. Professional pest control inspections are recommended, if you have any suspicions of possible infestations. If structural damage is found, a licensed contractor should be consulted.

Landscaping: Garden beds look their best when mulched and weeded. Summer annuals produce more flowers and bloom longer when you deadhead them. Removing spent flowers also prevents the plant from going to seed. Check garden plants, trees, and shrubs for insect infestations. Unhealthy plants should be removed so that others may thrive.

Lawns: Lush green grass is desirable; however, it is not always realistic or water-efficient. Encourage healthy grass growth with regular mowing, and remember that keeping grass cut longer in the summer months will prevent roots from drying out as quickly. Grass and plants should be watered in the morning to allow the water to soak through the soil throughout the day in order to completely nourish their root systems. Check to see if your municipality has water conservation restrictions before watering your lawn or garden.

Trees: Trees provide shady ambience and should be well cared for to avoid potential damage to your home. Keep their branches pruned and at a safe distance from your home to avoid storm-related damage. Inspect trees for signs of decay, such as cracks or hollowed limbs, and keep branches clear of your home and power lines.

B & D Construction staff are experienced in all types of home repair, and would love to assist you with your projects. If you would like our assistance, please call us at 508-823-2413 or visit our website: banddconst.com.
